

# CUSTOM SINGLE-USE PROCESS SYSTEMS

When it comes to single-use processing, one-size does not fit all. IPEC single-use systems provide true customization for a variety of critical biopharmaceutical applications.

Ultimate flexibility in process design, component selection, 3rd-party tube kit suppliers, control hardware and automation platforms enable our customers to work with IPEC to develop production systems unlike anything else commercially available.

CHROMATOGRAPHY ■  
GENE THERAPY ■  
VACCINE PRODUCTION ■  
CELL CULTURE ■ MIXING ■  
BIOREACTOR ■ mAbs  
PRODUCTION ■ TFF ■  
CLARIFICATION ■ UF/DF ■  
VIRAL FILTRATION
